

Center for Functional MRI Users,

Beginning mid-June and continuing through mid-September 2010, traffic on Osler Lane will be impacted due to construction in the School of Medicine. During this period portions of Osler Lane will be CLOSED to both vehicular and pedestrian traffic. In addition, portions of Parking Lot P603 will be impacted. Detours and signage will be provided directing both vehicular and pedestrian traffic around those areas.

**Beginning Thursday, June 10<sup>th</sup>, the two reserved parking spaces (133D and 134D) allocated to the Center will be moved to a new location at the front of the Skaggs School of Pharmacy and Pharmaceutical Sciences Building.** The attached map (and photo below) indicates the location of the new parking spaces. The spaces will be identified with signs reading "Center for Functional MRI" and 133D/134D painted on the ground.

To access the Center from the new reserved spaces, subjects can walk through the Skaggs building lobby between the hours of 7:00 a.m. to 7:00 p.m. Monday to Friday. Outside those hours, access will be by walking around the Skaggs building to Osler Lane. The attached map also shows the pedestrian routes to the Center.

If you need any help locating the new reserved parking spaces please contact Mary O'Malley at (858) 822 0513 or [momalley@ucsd.edu](mailto:momalley@ucsd.edu).

Please remember that the reserved parking spaces are strictly for use by subjects and should not be used by Investigators or Operators.

Thank you all for your cooperation. We will keep you informed of developments.

CFMRI

### **New Reserved Spaces 134D and 133D in front of Skaggs Pharmacy Building Center for Functional MRI Signs will be added next week.**
